

**GUIDE TO ACCESS THE FILES PUBLISHED IN ESIOS BY THE REE'S SETTLEMENT
DEPARTMENT**

- This document has no legal value. Although efforts have been made to ensure that the information is updated and accurate, the transmission system operator declines all responsibility for the information contained therein. The information contained in this document is of a general nature and does not allude to the specific circumstances of specific Market participants nor does it constitute manifestations of professional or legal opinions.
- The transmission system operator declines all responsibility for losses suffered as a result of decisions, actions or omissions based on the information published in this document. In particular, the transmission system operator disclaims all liability for consequential economic loss or damage, including, without limitation, any business loss or lost profit resulting directly or indirectly from, or related to, the publication of this document by the transmission system operator, and the use that could be made of this document.

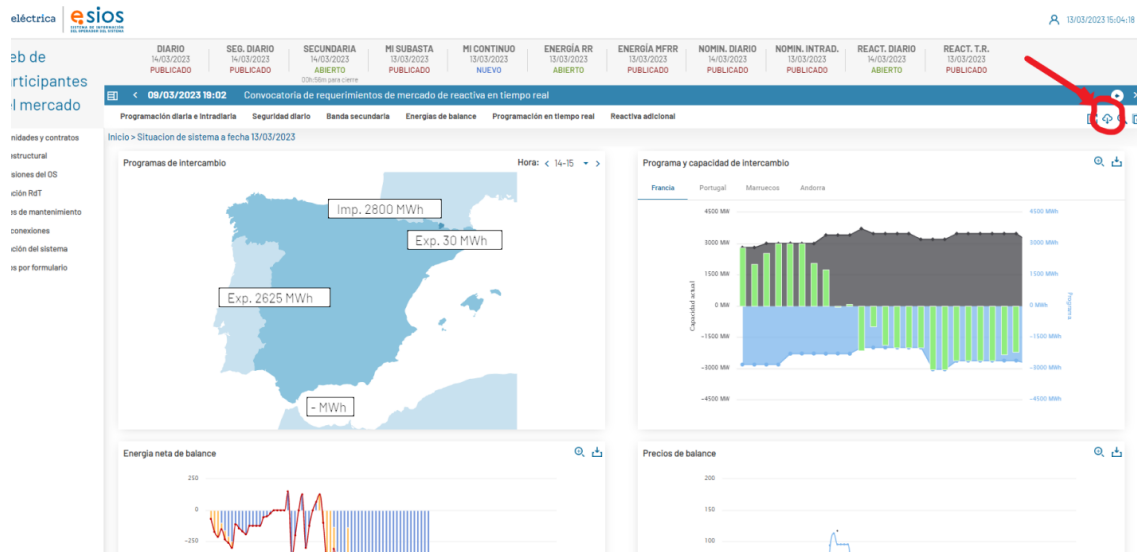

The purpose of the following document is to explain how to access the files published by REE on the market participants' website (eSIOS). These files contain detailed information of the system operation settlement invoiced by MEFF (third party authorized by REE).

The steps to follow are detailed below:

- 1.- Have a digital certificate for access to the eSIOS Market participants' website, issued by REE or OMIE. If you still do not have the digital certificate, contact eSIOS Support team through soportesios@ree.es or through the "Contacta con nosotros" module of the Customer Services Portal (PASOS).
- 2.- Once you have downloaded and installed the digital certificate you can access the Market participants' website: <https://participa.esios.ree.es/>
- 3.- Press "Accede al sistema", bottom right.

4.- Press over the cloud, indicated in red colour:

5.- “Descargas desde repositorio” will appear on the screen, where you have to filter by “Liquidaciones” and “Liquidaciones: Liquidaciones”:

6.- The file in zip format that is downloaded, once uncompressed, contains files in pdf format, which are self-explanatory and offer easily accessible summarized information, and text files, which allow computer processing.

All the files published, both in the settlement zip for each participant and in the liquicomun data zip for the settlement, are described in the 'modelcom' pdf which is published in the liquicomun A1 or A2 zip for the current month.
